AVIONICS

AVIONICS

TAE Aviation provides leading avionic system installation services and avionics line maintenance services.

Supporting the installation and line maintenance services, the avionics workshop at Adelaide Airport offers extensive repair and overhaul capability for:

- pitot/static and gyroscopic instrumentation
- engine instrument control and indication systems
- flight management and indication system components
- autopilot control and management equipment
- radio navigation and communication equipment
- weather radars, transponder systems and DME
- emergency equipment
- battery maintenance

TAE Aviation also provides aircraft line avionics support and avionic system installation services.

As well as being CASA approved for all activities mentioned, TAE Aviation is also an FAA-certified repair station for Single Red Line (SRL) Computers for various aircraft and Electronic Engine Computers (EEC) for the Cessna 441 Conquest.

The TAE Group offers the broadest range of services in the aviation industry with a strong emphasis on responsive service, on-time delivery, product reliability and outstanding value.
